

Atlassian Training

Training Partner

Valid until December 2026

togetha

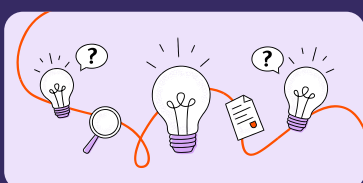

Togetha offers Atlassian-certified training for teams of all sizes through public or private sessions.

As an Authorised Atlassian Training Partner, we provide accredited, instructor-led courses across Asia-Pacific for 5-10 participants.

We can also create fully **bespoke training packages** capable of accommodating any group size.

Public Sessions

Flexible and accessible Atlassian Certified training that pairs expert tuition with diverse experiences from other teams and industries.

Public sessions deliver the full range of Atlassian-certified courses, covering everything from service request management to automation to big-picture strategic planning.

Perfect for:

Individuals seeking actionable insights and fresh perspectives in a community-focused environment.

Private Sessions

Focused Atlassian Certified training for your team only, where shared goals and real workflows shape the learning experience.

Private sessions deliver the same Atlassian-certified courses as the public ones, but with your needs and priorities at the centre of all discussions and activities.

Perfect for:

Teams wanting to strengthen their collaboration and upskill together in a team-focused setting.

Bespoke Training

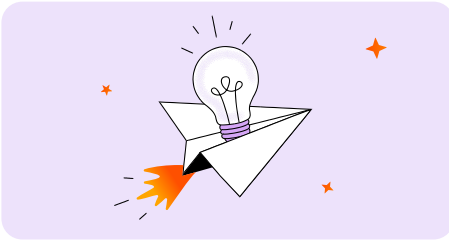

A fully customised training programme specially designed for your organisation, which dives into the challenges and opportunities unique to you. We'll start with a detailed analysis of your training needs, then craft a programme to deliver the right skills, in the right way, to the right people.

This can include online or in-person tuition, custom-built learning resources, and ongoing support.

Perfect for:

Orgs seeking high-impact training that can scale to any number of participants and deliver precisely targeted results.

How are Togetha's Atlassian training courses delivered?

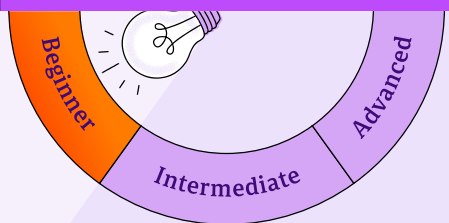

Tailored to different needs and budgets, our Atlassian training courses include expert instruction, live demonstrations, and interactive activities using web-based lab instances.

Most of our courses are currently being delivered online. Courses are in English, but we can organise training in other languages, including Mandarin, Cantonese, and Korean.

Atlassian Training FAQs

Is a Jira certification worth it?

Yes. Atlassian and Jira certifications demonstrate proven, job-ready skills with Atlassian tools and show employers that you can streamline workflows, improve collaboration, and help teams scale. Atlassian-certified professionals stand out to employers because hundreds of thousands of organisations use Atlassian tools.

Atlassian certifications are also good for teams as a whole, because they help everyone stay aligned on agile standards, best practices, and collaboration frameworks.

Aren't Atlassian Learning courses free?

Atlassian Learning does offer a number of its courses for free. However, these are self-paced, on-demand tutorials. The courses we offer are much more in-depth, instructor-led Jira classes with live demonstrations, hands-on activities, and focused support designed to help you apply your knowledge to real-world business scenarios.

Do Atlassian certifications expire?

Yes. An Atlassian certification is valid for 24 months. There are two paths to renewing a certification: retaking the exam or earning continuing education (CE) units by completing a course and/or participating in Atlassian events. Togetha's training programmes can help you whichever path you choose.
